

HURRICANE IRENE WAS THE
SECOND LARGEST STORM IN
OUR COMPANY'S HISTORY.

BUT IT WAS OUR
CUSTOMERS' SUPPORT
THAT BROKE RECORDS.

Dominion would like to thank our customers for their
patience and understanding before, during and after the storm.

Before Irene was through, she'd knocked out power to more than one million Dominion customers and cut a path of damage and destruction along the East Coast that rivals anything we've ever seen. She was fierce. She was relentless. She knocked down thousands of utility poles and blew out hundreds of transformers. But she was no match for our customers.

You prepared before Irene arrived. You did all you could to stay safe while she was here. And you helped your neighbors, reported your outages and maintained a level of patience during the restoration process that was remarkable. You proved, once again, that while Mother Nature can throw quite a punch, together we can get through just about anything. Thank you.
