

How much does it cost to run that new plasma television?

Now you can find out
with **“Watts Up?”**

With this energy-conservation tool from Dominion Virginia Power you can determine how much it costs to run appliances or electronics. Just plug any standard 120-volt appliance or electrical device into *Watts Up?* and you'll get a complete analysis of:

Cost of Operation • Current Draw • Incoming Voltage • Run Time

Watts Up?\$95.95

Watts Up? PRO \$129.95

Watts Up? PRO ES \$189.95

(Plus sales tax and shipping.)

Watts Up? PRO includes a valuable payback calculator and numerous usage graphs that can be downloaded to your computer for analysis. **PRO ES** boasts 4X the memory of PRO.
